

Paper Quill Instructions

YOU WILL NEED:

- A piece of letter size plain white paper
- A pencil or basic pen
- A glue stick
- A pair of scissors

STEPS:

1. Fold your piece of paper in half.
2. Open the page and place your pencil in the middle of one side of the paper. Ensure that the writing end is extended beyond the edge of the sheet.
3. Using the glue stick, draw a line of glue all the way around the pencil.
4. Fold the paper over again, and pinch to seal the paper around the pencil.
5. To create a short stem to hold when writing, cut a 1" thick horizontal strip of paper on either side of the pencil's writing end. Shorten both strips to 1" in length; roll the flaps around the pencil and seal with glue.
6. Using your scissors, cut the feather outline of your quill around the pencil.
7. Feather the paper by cutting very thin diagonally slanted strips down either side of the paper quill.
